CHT CHT-V

Centrifugal roof extractors

Construction Characteristics

- Cold laminated steel base-plate.
- Backward-curved centrifugal turbine. Dynamically balanced and low sound level.
- Asynchronous motors with squirrel-cage rotor.
Single-phase 230V, 50 Hz, IP-54 protection, class F insulation.
Three-phase 230/400V, 50 Hz. IP 55 protection and Class F thermal insulation.
- Cowl with anti-corrosive protection.
- Standardised safety guard in accordance to DIN 24167.
- Aluminium cooling wheel.
- Corrosion-proof finish in polyester resin, polymerised at 180°C, after degreasing, phosphating and passivation pre-treatment.
- On request:
 - 60 Hz motors.
- Our series of extractors are equipped for continuous work with fluid at 120°C; maximum temperature: 400°C/2hours.

• Series with LGA1 certification in accordance with European standard EN12102-3.

⁽¹⁾ The sound level values are pressures in dB(A), measured at 6 metres and at 2/3 of maximum airflow (2/3 Qmax)

CHT CHT-V

Accoustic characteristics

The values indicated are calculated according to free-field sound output and pressure levels in dB (A) at a distance of 6 metres.

Sound power spectrum Lw(A) in dB(A) by frequency band in Hz.

Aspiration values taken with 2/3 of maximum airflow (2/3 Qmax).

Discharge values taken with 2/3 of maximum airflow (2/3 Qmax).

630-12	42	56	64	68	67	64	58	52

To obtain sound power spectrum Lw in dB(A) in aspiration at maximum airflow (Qmax), add the values from the following table to the LpA sound pressure level given in the characteristics curves:

Frequency band in Hz.							
63	125	250	500	1000	2000	4000	8000
2	9	15	15	18	18	11	5

Variation of sound pressure according to distance:

The sound level can vary depending on the roof structure.
